EXPERIENCE

Founder & Full-Stack Developer 2026 - Present
TooleraAI *Self-Employed*

- Founded and developed TooleraAI, a scalable platform providing AI, PDF, image, SEO, developer, calculator, converter, and productivity tools for global users.
- Engineered full-stack tools and APIs using Next.js, React, TypeScript, Node.js, MongoDB, and REST APIs; deployed production workloads on Linux VPS using Docker, Nginx, PM2, SSL, GitHub Actions, and CI/CD.
- Implemented technical SEO, structured data, indexing, internal linking, analytics, web performance optimization, and AI/LLM integrations to support organic growth and scalable tool development.

Full Stack & AI Developer 03/2026 - Present
ForestGate Global Advisors *Full Time*

- Architected and launched YogiAI.live, an AI-powered Vedic astrology SaaS using Next.js, TypeScript, React, Node.js, Firebase, Razorpay, and LLM APIs with web and mobile (Capacitor) support.
- Built secure RBAC, subscription billing, AI chat, WebRTC voice, analytics, and automated email workflows using Firestore, Razorpay, Brevo, Resend, Socket.IO, and real-time technologies.
- Developed and deployed StudyMates.live and scalable backend infrastructure using MERN, Agora RTC, Docker, Linux VPS, Nginx, PM2, REST APIs, and GitHub Actions CI/CD for real-time, cross-device applications.

MERN Stack Web Developer 03/2025 - 02/2026
Riddhi Control System *Full Time*

- Built scalable MERN applications with modular architecture and secure JWT-based authentication systems.
- Developed highly optimized REST APIs handling 1000+ daily requests with improved performance efficiency.
- Improved overall frontend performance by 30% and boosted development productivity using advanced AI tools.

PROJECTS

YogiAI.live – AI-Powered Vedic Astrology Platform Live

- Built a full-stack AI SaaS using Next.js, TypeScript, React, Node.js, Firebase, and Razorpay with secure subscription-based authentication, scalable cloud deployment, and role-based access control.
- Developed a custom Vedic astrology engine, LLM-powered AI chat, WebRTC voice, and real-time credit management without third-party astrology APIs, delivering accurate personalized astrological insights.
- Built an RBAC admin panel and deployed on Linux VPS using Docker, PM2, Nginx, GitHub Actions CI/CD.

StudyMates – Real-Time Virtual Study Platform Live

- Built a scalable real-time virtual study platform featuring live video rooms, chat, follow system, timers, and session tracking using MERN, Socket.IO, and Agora RTC.
- Developed low-latency real-time architecture and optimized frontend and backend APIs for seamless user experiences.
- Deployed on Hostinger VPS using Docker, Nginx, PM2, and CI/CD with React.js, Node.js, Express.js, and MongoDB.

ACHIEVEMENT

- Secured 20,000 funding from CST, UP Government for Nomophobia Prediction Project.
- Presented research on Nomophobia EDA using Python at ICISC 2023, Jaipur.
- Solved 400+ DSA problems on LeetCode, GeeksforGeeks, and HackerRank.
